practical - 4

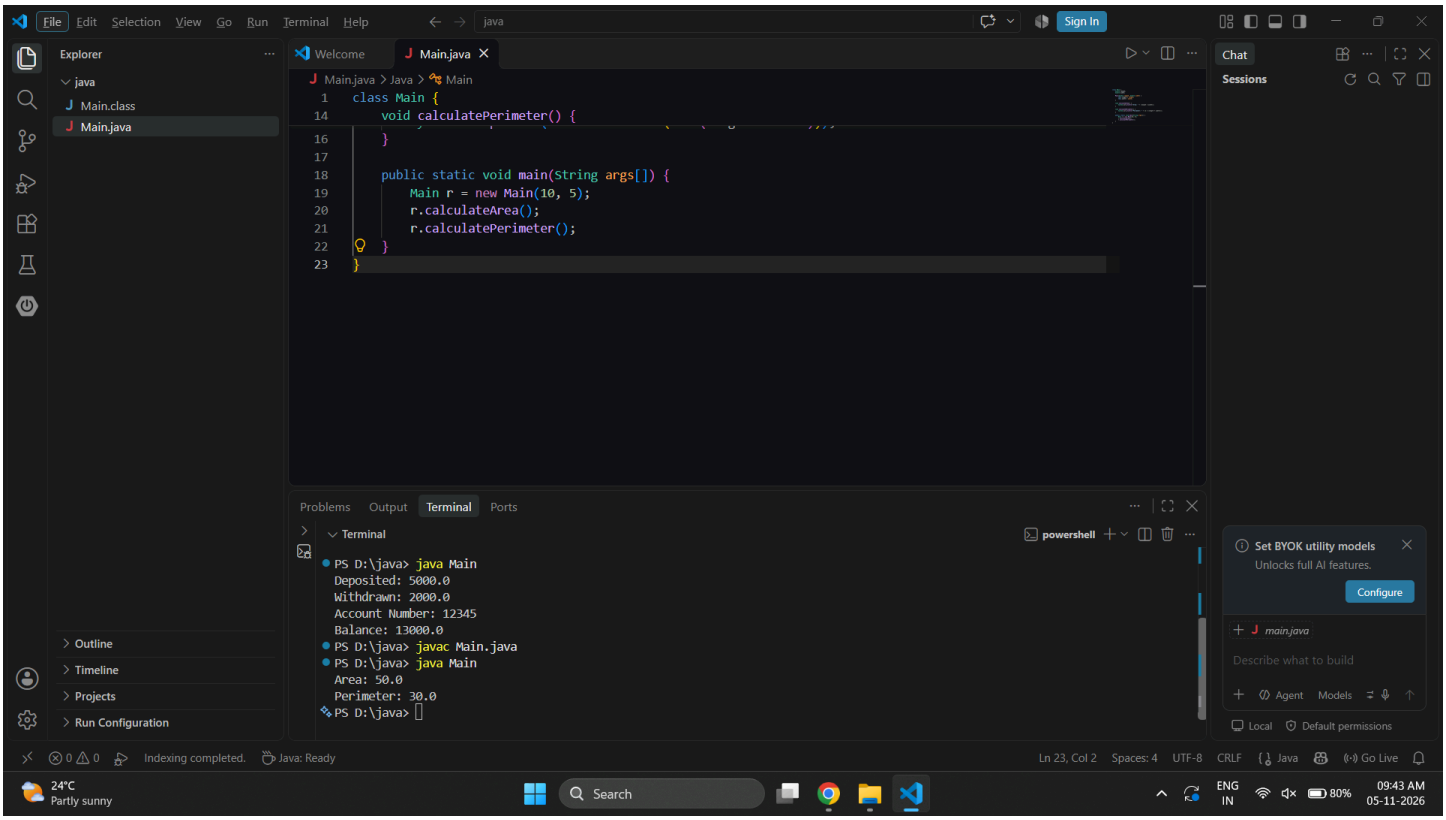

```
class Main {
    double length;
    double width;

    Main(double length, double width) {
        this.length = length;
        this.width = width;
    }

    void calculateArea() {
        System.out.println("Area: " + (length * width));
    }

    void calculatePerimeter() {
        System.out.println("Perimeter: " + (2 * (length + width)));
    }

    public static void main(String args[]) {
        Main r = new Main(10, 5);
        r.calculateArea();
        r.calculatePerimeter();
    }
}
```
